Volume 131 (1984)

cision repair participates in the Weigle reactivation of ultraviolet light-irradiated ϕX174 double-stranded DNA (MTR 06025)
by J.R. Silber and P.M. Achey (Jefferson and Gainesville) 1– 10
multicopy *phr*-plasmid increases the ultraviolet resistance of a *recA* strain of *Escherichia coli* (MTR 06021)
by Kazuo Yamamoto, Mitsunobu Satake and Hideo Shinagawa (Kobe and Suite) 11– 18
NA repair kinetics after low doses of X-rays
A comparison of results obtained by the unwinding and nucleoid sedimentation methods (MTR 06023)
by Peter E. Bryant, Regina Warring and Gunnar Ahnström (Frankfurt am Main and Stockholm) 19– 26
^{6}-Methylguanine – DNA methyltransferase in human cells (MTR 06024)
by Daniel B. Yarosh, Mary Rice and Rufus S. Day III (Bethesda) 27– 36
uman lymphocytes treated with *r*-7,*t*-8-dihydroxy-*t*-9,10-epoxy-7,8,9,10-tetrahydrobenzo[*a*]pyrene require low-density lipoproteins for DNA excision repair (MTR 06027)
by C.O. Joe, P.W. Rankin and D.L. Busbee (College Station and Denton) 37– 43
elationship of methyl purines produced by MNNG in adenovirus 5 DNA to viral inactivation in repair-deficient (Mer^-) human tumor cell strains (MTR 06032)
by Rufus S. Day III, Daniel B. Yarosh and Chuck H.J. Ziolkowski (Bethesda) 45–52
ignal of induction of recA protein in *E. coli* (MTR 06026)
by B. Salles and M. Defais (Toulouse) 53–59
bnormal sensitivity of some Cockayne's syndrome cell strains to UV- and γ-rays
Association with a reduced ability to repair potentially lethal damage (MTR 06028)
by P.J. Deschavanne, N. Chavaudra, B. Fertil and E.P. Malaise (Villejuif) 61–70
omparative analysis of caffeine and 3-aminobenzamide as DNA repair inhibitors in Syrian baby hamster kidney cells (MTR 06030)
by Shishir K. Das, Ching C. Lau and Arthur B. Pardee (Boston) 71–79
nhibition and recovery of the rate of DNA synthesis in V79 Chinese hamster cells following ultraviolet light irradiation
Variation in the rate of movement of the replication fork (MTR 06029)
by Armando M. Ventura and Rogério Meneghini (São Paulo) 81–88
Comparative mutagenesis by aminofluorene derivatives
A possible effect of DNA configuration (MTR 03840)
by Ernest P. Heller, E. Joshua Rosenkranz, Elena C. McCoy and Herbert S. Rosenkranz (Cleveland) 89– 95
UV irradiation alters deoxynucleoside triphosphate pools in *Escherichia coli* (MTR 03831)
by Shishir K. Das and Lawrence A. Loeb (Seattle) 97–100
The SOS-function-inducing activity of chemical mutagens in *Escherichia coli* (MTR 06037)
by Toshihiro Ohta, Naoko Nakamura, Masaaki Moriya, Yasuhiko Shirasu and Tsuneo Kada (Tokyo and Mishima) . 101–109
Induction of the SFIA SOS repair function by psoralens in the dark (MRLett 00525)
by Pierre Lecointe (Toulouse) 111–113
Induction of SOS functions is not required for $recA^+$-dependent mutagenicity of 9-aminoacridine in *Salmonella typhimurium* strain *trpE*8 (MRLett 00548)
by D.M. Podger and Ruth M. Hall (Sydney) 115–121
Differential toxicity of 3-aminobenzamide to wild-type and 6-thioguanine-resistant Chinese hamster cells by interference with pathways of purine biosynthesis (MRLett 00539)
by James E. Cleaver (San Francisco) 123–127
DNA-strand breaks associated with halogenated pyrimidine incorporation (MTR 03829)
by L.E. Dillehay, L.H. Thompson and A.V. Carrano (Livermore) 129–136
Simultaneous demonstration of UV-type and ionizing radiation-type DNA repair by the nucleoid sedimentation technique (MTR 06038)
by P. Aldenhoff and K. Sperling (Berlin) 137–142
Repair of X-ray-induced single-strand breaks in root tips of Tradescantia clones 02 and 4430 (MTR 06033)
by J. Veleminský and J. Van't Hof (Praha and Upton) 143–146

DNA damage and repair in embryonic mouse limbs exposed to teratogenic doses of methylnitrosourea (MTR 06036)
by Rita Loch-Caruso and C. Stuart Baxter (Cincinnati) 147–155
Formation and removal of benzo[*a*]pyrene metabolites–DNA adducts in cultured normal human fibroblasts using a microsome-activating system (MTR 06031)
by Motohisa Kaneko (Tokyo) 157–161
The role of deoxynucleoside triphosphate pools in the inhibition of DNA-excision repair and replication in human cells by hydroxyurea (MTR 06034)
by Ronald D. Snyder (Farmington) 163–172
Analysis of metal-induced DNA lesions and DNA-repair replication in mammalian cells (MTR 06039)
by Steven H. Robison, Orazio Cantoni and Max Costa (Houston) 173–181
Enzymatic repair of premutagenic DNA lesions in human epidermis
Quantitation of O^6-methylguanine–DNA methyltransferase and uracil–DNA glycosylase activities (MTR 06035)
by Bjørnar Myrnes, Guri Eggset, Gunnar Volden and Hans Krokan (Tromsø) 183–186
Inhibitors of DNA synthesis (aphidicolin and araC/HU) prevent the recovery of RNA synthesis after UV-irradiation (MRLett 00554)
by L.V. Mayne (Brighton) 187–191
A DNA-repair proficient strain of *Escherichia coli* which is highly sensitive to mutagenic acridines in plate tests (MRLett 00556)
by Susan M. Thomas and D.G. MacPhee (Bundoora) 193–196
Introduction of the plasmid pKM101-associated *muc* genes into *Saccharomyces cerevisiae* (MTR 06041)
by A.A. Potter, Earle R. Nestmann and V.N. Iyer (Ottawa) 197–204
Critique on the analysis of photorepair in chick-embryo fibroblasts (MRLett 00547)
by B.V. Bronk and W.P. van de Merwe (Clemson and Aberdeen Proving Grounds) 205–207
DNA-ligase activities appear normal in the CHO mutant EM9 (MTR 06042)
by John Y.H. Chan, Larry H. Thompson and Frederick F. Becker (Houston and Livermore) 209–214
Influence of the culture time on DNA damage and repair in isolated rat hepatocytes exposed to nitrochlorobenzene derivatives (MTR 03847)
by C.F. Cesarone, E. Fugassa, G. Gallo, A. Voci and M. Orunesu (Genoa) 215–222
Sensitivity of Bloom syndrome fibroblasts to mitomycin C (MTR 03857)
by G.J. Hook, E. Kwok and John A. Heddle (Toronto, Downsview and Ottawa) 223–230
Age-related variation in the DNA-repair synthesis after UV-C irradiation in unstimulated lymphocytes of healthy blood donors (MTR 06040)
by E. Kovacs, W. Weber and Hj. Müller (Basel) 231–238

Contents, Vol. 131 (1984) 239–240
